

CPS CAN PROVIDE ASSESSMENTS

With our partnership with ESI, we can provide a variety of assessment and coaching services. These services will ensure that our students receive the right training and apply new knowledge and skills to their jobs. They will also ensure that your organization has the right processes and methods in place to manage your projects more effectively.

Measuring Individual and Organizational Capabilities

Whether you are focusing on individual capabilities or measuring the knowledge and skills of your organization as a whole, our assessment services help you identify strengths and areas that need improvement.

- ❖ **Individual Assessments:** by assessing individual competencies for each student, you can more effectively target your training efforts, set course benchmarks to measure success and determine areas in which training reinforcement is necessary.
 - Knowledge and Skills Assessment – measure your knowledge and skills with easy-to-use assessment tools, covering project management, business analysis, program management, contract management, information technology, etc.

- ❖ **Organizational Assessments:** by assessing organizational performance, you can ensure that you have the systems and processes in place to efficiently complete your projects on time and on budget, while also identifying obstacles in the way of success.
 - Organizations assess many processes across the PMBOK knowledge areas, receiving a maturity score; upon completion, we provide a prioritized list of recommendations to improve performance and to help you advance to the next level.

Contact Us: If you would like more information about our individual or organizational assessments, please contact us at (248) 352- 9917.
